SMARTBRIDGE
Let's bridge the gap

SKILL WALLET
A Great Start-up Product

Initial Project Planning Template

Date	15 March 2026
Team ID	SWTID-2026-9550
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create a product backlog and sprint schedule. Story points, priorities and sprint grouping below are proposed planning values for the project.

Sprint	Functional Requirement (Epic)	Story Number	User Story / Task	Story Points	Priority	Team Members	Sprint Start Date	Sprint End Date (Planned
print-1	User & Role Creation	ACL-1	As an administrator, I can create the EEE test user and assign the required custom roles bb1, bb2, bb3 and bb4.	2	High	All 5	—	—
print-1	Table Creation	ACL-2	As an administrator, I can create the Institution Details table u_institution_details with the required student, faculty, branch and contact fields.	3	High	All 5	—	—
print-2	Read ACL	ACL-3	As an authorized user, I can read EEE branch records according to the script-controlled READ ACL; users without the role are denied and admin has full access.	3	High	All 5	—	—
print-2	Create ACL	ACL-4	As a user with the required role, I can create records in u_institution_details through the CREATE ACL.	2	Medium	All 5	—	—
print-2	Write ACL	ACL-5	As an authorized user, I can edit EEE branch records through the WRITE ACL when the required role combination is present.	2	High	All 5	—	—
print-3	Delete ACL	ACL-6	As an authorized user, I can delete EEE branch records through the DELETE ACL when the required role combination is present.	2	Medium	All 5	—	—
print-3	Verification & Conclusion	ACL-7	As a project team, we can impersonate users and verify READ, CREATE, WRITE and DELETE behaviour and document the security outcome.	2	High	All 5	—	—

Planning Basis

- Project platform: ServiceNow.
- Custom table: u_institution_details (Institution Details).
- Fields include Student Roll Number, Student Name, Faculty Name, Branch (ECE/EEE/CSE), Email, Phone Number and Description.
- ACL sequence: READ → CREATE → WRITE → DELETE, using bb1, bb2, bb3 and bb4 roles.
