Demonstration of Proposed Features

Date	29 September 2026
Team ID	SWTID-2026-9550
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures the proposed features of the Script-Controlled ACL project and tracks whether each feature was implemented and demonstrated. It provides evidence of the team's implementation of role-based and field-based record access control in ServiceNow.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User & Role Creation	Create the EEE User and custom roles bb1, bb2, bb3 and bb4 and assign roles to the user.	Implemented	Yes	Roles support different ACL operations.
2	Institution Details Table	Create u_institution_details table with student roll number, student name, faculty, branch, email, phone and description fields.	Implemented	Yes	Branch field is used for access control.
3	Script-Controlled READ ACL	Restrict record read access using the ACL script and the EEE branch condition; admin users retain access.	Implemented	Yes	bb1 users can access EEE records; others are denied.
4	CREATE ACL	Allow users with the bb2 role to create records in the institution details table.	Implemented	Yes	Verified with required role.
5	WRITE ACL	Allow users with the bb3 role to edit records after the required access roles are present.	Implemented	Yes	Verified for EEE branch records.
6	DELETE ACL	Allow users with the bb4 role to delete records after the required access roles are present.	Implemented	Yes	Verified for EEE branch records.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
