A SmartBridge Project

Brainstorming & Idea Prioritization Template

Date	29 September 2026
Team ID	SWTID-2026-9550
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists ideas related to the Script-Controlled ACL project. Ideas are grouped according to their common purpose before prioritization.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	K. Sangavi	Restrict record access based on the Branch field value.	Record Security	1
2	S. Shri Kamali	Use a script-controlled Read ACL to allow authorized users to view records.	Read Access	1
3	M. Shafrin Banu	Use role-based Create, Write and Delete ACLs for controlled record operations.	CRUD Access	2
4	A. Varsha	Provide full access to administrators while restricting other users.	Admin Control	2
5	S. Veera Lakshmi	Verify access by impersonating users with different roles.	Testing & Verification	3
6				

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Field-based record restriction with Script-Controlled Read ACL	High	High	1	Yes
2	Role-based Create, Write and Delete access control	High	High	2	Yes
3	User impersonation and ACL access verification	High	Medium	3	Yes

Project basis: The ideas above are derived from the project workflow: creating users and roles, creating the Institution Details table, and implementing Read, Create, Write and Delete ACLs with role and field-value based access control.
